vertical lines designate:

1. character break
 - a. Separates information during individual character construction.
2. word break
 - a. Separates information during word construction.
3. page break
 - a. Separates information during page construction.

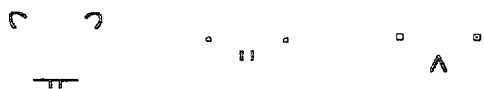

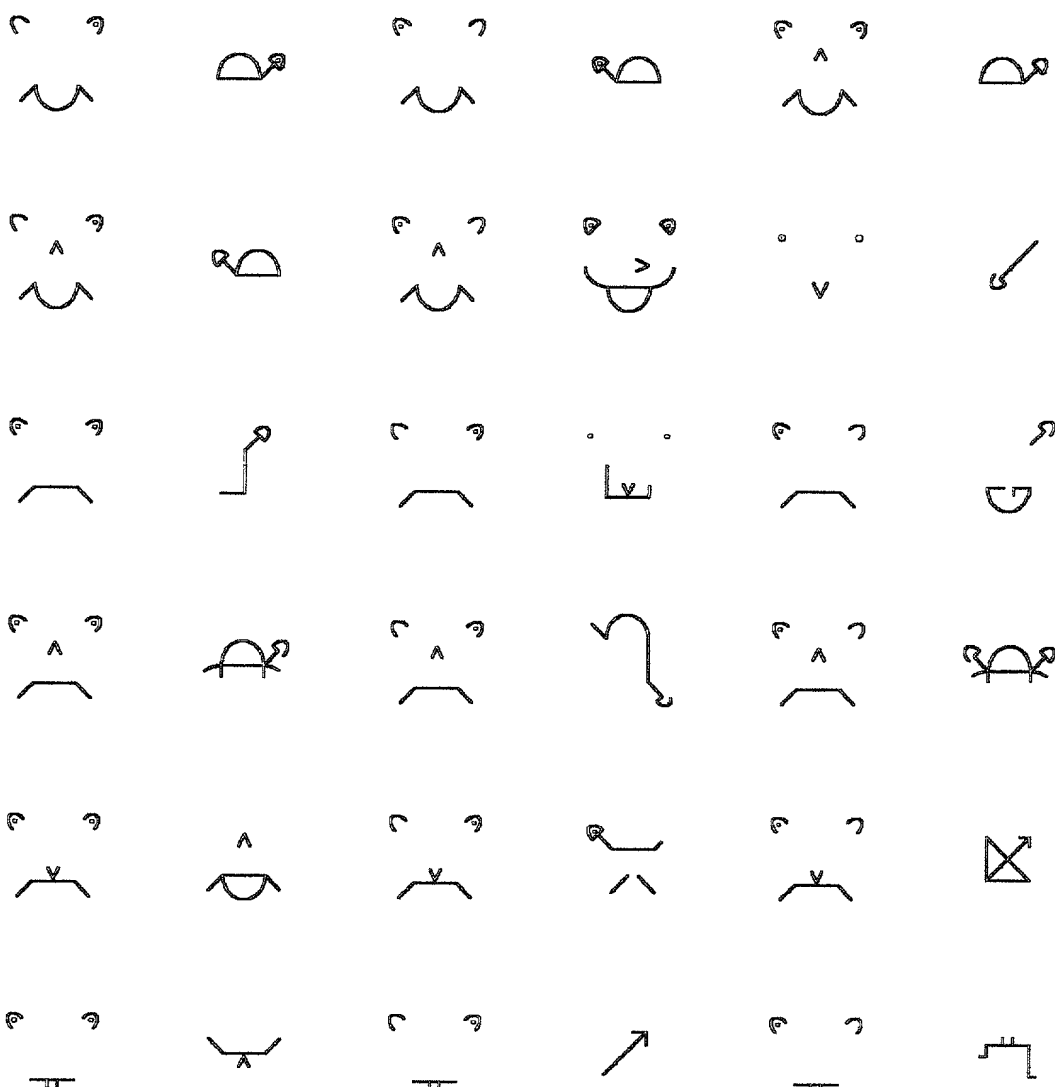

Unrelated data can be placed inside letters, words, or pages without affecting original information by entering break punctuation at start and finish points.

Security :

DRYBEDOC Alphabets allow characters to change names without altering size, shape, color, or appearance.

Accomplished by assigning the 26 independent designs a different alphabet order.
